Purina® Game Bird Layer

Purina® Game Bird Layer supports egg production, embryo development and chick vigor. Optimum nutrition for egg-laying game birds, ducks and geese.

Supports egg production

All the nutrients needed for proper production and eggshell strength.

Balanced levels of amino acids, energy, vitamins and minerals

Designed to keep breeders in top condition for egg production and hatchability.

High protein

18% protein to support bird health, egg production and health, strong chicks.

Calcium-fortified

For strong egg shells.

Optimum levels of amino acids and salt

Proper blend of amino acids and salt help suppress aggressive behavior and cannibalism.

Easy-feeding crumbles

Crumble form to encourage feed intake while providing complete and balanced nutrition in every bite.

For more information, contact your local Purina retailer or visit purinamills.com/game-bird-feed.

FEEDING DIRECTIONS

Feed Purina® Game Bird Layer feed to game bird and exotic hens at onset of egg production until hen is out of egg production. When game birds are not laying, feed Purina Game Bird Flight Conditioner. If the birds are getting overconditioned in the off-season, switch them to Purina Game Bird Maintenance. Repeat this cycle each season as hens go in and out of egg production..
