

Purina® Layena® + Omega-3

Purina® Layena® Omega-3 feed includes all 38 nutrients hens need with added omega-3. With Layena® Omega-3 feed, hens can produce eggs with more omega-3 fatty acids than store-bought eggs.²

Purina® Layena® Omega-3 pellets are a complete feed for laying hens 18 weeks and older to support optimal hen health and consistent egg production with added omega-3 fatty acids. Purina® Layena® Omega-3 includes the **Oyster Strong® System** for strong shells.

Purina® **Oyster Strong® System** with oyster shell provides another source of calcium when the hens need it most. Oyster shell is a larger particle size than limestone. This means that oyster shell will stay in the digestive tract longer and will provide a source of calcium for egg shell production over a longer period of time than smaller particle sources of calcium. This is especially important at night when egg shell formation is rapidly occurring and dietary sources of calcium are limited because the bird is not eating.

² *When fed a diet of Layena® Omega-3 exclusively for at least 3 weeks. Based on large egg (56g). Results may vary with factors such as total diet and hen health. Compared to a typical egg that contains 50mg omega-3 fatty acids.*

Features & Benefits

Added egg nutrition

Formulated to produce a large egg that contains 250 mg omega-3 fatty acids as compared to a traditional, store-bought large egg that contains 50 mg of omega-3 fatty acids²

Includes the Oyster Strong® System

Large-particle calcium breaks down steadily, so calcium is available during the entire egg formation process

16% protein, 3.50% calcium

Maintains hen health and supports consistent egg production

Essential amino acids

Enhanced with lysine and methionine to help produce wholesome eggs and beautiful feathering

Prebiotics and probiotics

Supports immune and digestive health

Added marigold extract

For brightly colored yolks

Nutrients

Nutrient	Min / Max	Amount
Crude Protein	MIN	16.00 %
Lysine	MIN	0.70 %
Methionine	MIN	0.30 %
CrudeFat	MIN	3.50 %
Omega-3 Fatty Acid	MIN	1.00 %
Crude Fiber	MAX	7.00 %
Calcium (Ca)	MIN	3.25 %
Calcium (Ca)	MAX	4.25 %
Phosphorus (P)	MIN	0.45 %
Salt (NaCl)	MIN	0.20 %
Salt (NaCl)	MAX	0.70 %
Manganese (Mn)	MIN	100 PPM
Vitamin A	MIN	3000 IU/LB
Vitamin D3	MIN	1000 IU/LB
Vitamin E	MIN	70 IU/LB

Feeding Directions

Description

1. Feed Purina® Layena® Plus Omega-3 pellets free-choice as the sole ration to laying chickens (including backyard egg producers, small to medium breeds and show and ornamentals) after 18 weeks of age and throughout the laying cycle.
2. Purina® Layena® Plus Omega-3 pellets should only be fed to chickens that are laying eggs.
3. Always provide shelter and a constant supply of fresh, clean water.
4. Consumption will vary depending upon season of the year, nutritional needs of the animals and availability of other foods.

Caution

Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death.

Important

A feeding program is only as effective as the management practices. Actual results can vary depending upon feed intake, environmental conditions and the quality of management practices.
