

THE FORMULA FOR SUCCESS®

Re•Leve®

As the first research-based, low-starch feed, Re•Leve® is designed for horses prone to muscular disorders and metabolic syndromes, including:

- POLYSACCHARIDE STORAGE MYOPATHY (PSSM OR EPSM)
- LAMINITIS (FOUNDER)
- RECURRENT EXERTIONAL RHABDOMYOLYSIS (RER)
- CUSHING'S SYNDROME

Studies have shown that replacing traditional grain-based diets with Re•Leve results in significant improvement in horses with RER, PSSM and EPSM, providing relief from muscle stiffness and soreness when combined with regular daily exercise.

Feeding Instructions

Feed at a rate of 2.5-9 kg (6-20 lb) per day depending on the level of work as well as the size and body condition of the horse. Re•Leve Original should be fed with high-quality hay equaling at least 1-1.5% of the horse's body weight per day. Replace the horse's current grain ration with an equivalent amount of Re•Leve Original. If a horse requires less than 3 kg (6 lb) of grain per day, consider using Re•Leve Concentrate.

NUTRITIONAL ANALYSIS
