

# BUSH DOCTOR<sup>®</sup>

## SLEDGE HAMMER<sup>®</sup> NUTRIENT RINSE

- ◆ Designed to Remove Mineral Salt Buildup
- ◆ Acts as a Wetting Agent In Grow Medium
- ◆ Breaks Surface Tension for Water Movement

Bush Doctor<sup>®</sup> SledgeHammer<sup>®</sup> encourages water movement through soil and soilless media. High fertilizer use can compromise plant growth over time due to concentrated mineral salt deposits.

SledgeHammer<sup>®</sup> is a unique rinse formula designed to remove excess fertilizer buildup, which may relieve nutrient lockout. Derived from Yucca plant extract.

Use in established gardens, container plantings and hydroponic systems. Bush Doctor<sup>®</sup> SledgeHammer<sup>®</sup> is easy to use. There is no pretreatment and no need to stop feeding.
